

Abstract

A stove (10) comprising a baking muffle (12) is disclosed. Within the baking muffle (12) guide means (14, 15, 16, 17, 18, 19) for receiving at least one heatable cooking bowl (22) are provided, wherein the cooking bowl (22) comprises a substrate layer, in particular a bottom, at the outside of which a directly heatable heating layer is provided which is coated by an insulating layer (Fig. 1).
